INDEX TO VOLUME IV.

A.

Academy of Nat. Sciences, Philadelphia, Proceedings of, 149, 303, 455.
——, new series of Journal, in 4to, 440.
Acetate of lime, formed in coal pits, 275.
Acid, in the North American columbite, *H. Rose*, 408.
——, prussic, new test for, *J. Liebig*, 101.
——, tartaric, fermentation of, 271.
Acids, fat, of the oil of Ben, *P. Walter*, 271.
Acid reaction of gastric juice, 102.
Adams, T. B., experiments with gun-cotton in blasting, 139.
Adulteration of olive oil, mode of detecting, 272.
Agassiz, Prof., analogy between the fossil flora of Europe and recent of America, 424.
——, accepts a professorship in Harvard, 449.
Agricultural Botany, notice of *Darlington's*, 451.
Alabama nummulite limestone, age of, *C. Lyell*, 186.
——, beaver in, 285.
Albuminous substances, changes undergone by, in the stomach during digestion, *Prof. Mulder*, 402.
Alcargene, relations of glycocoll with, *T. S. Hunt*, 108, 266.
Alcohol, detection of traces, 102.
——, anhydrous, *Casoria*, 107.
Alumina, separation of, from oxyd of iron, *W. Kuop*, 102.
American Academy of Arts and Sciences, proceedings of, 455.
Ammonia, nitrate of, on the decomposition of, *E. Milton*, 269.
——, influence of, on nutrition of animals, 273.
——, bicarbonate of, exhaled from the lungs, 274.
Ammonium, sulphocyanid, new method for, *J. Liebig*, 101, 269.
Analysis, Outlines of Qualitative, followed in the Giessen Laboratory, notice of, 455.
Anatomical homologies, and fundamental type of the vertebrate skeleton, *R. Owen*, 123.
Aniline, compounds of phosphoric acid with, *C. Nicholson*, 108.
Animal chemistry, researches in, *J. Liebig*, 135, 298.
—— ——, ——, *Prof. Mulder*, 403.
Austed, D. T., works on Geology, noticed, 300.
Antarctic Ocean, diatomaceous vegetation of, *J. Hooker*, 424.
Anthracite coal, vegetation of, *J. E. Teschemacher*, 420.
Architects, Hints to Young, a work by *G. Nightwick*, noticed, 302.
Arkansite, account of, *C. U. Shepard*, 279.
Arsenic in vinegar, 272.
Association of American Geologists and Naturalists, officers of, 146.
—— —— —— ——, list of memoirs read at the meeting in September, 427.
Astronomy, progress of, 240.
Atmospheric waves, report on, *W. R. Birt*, 433.
Atomic number of Titanium, 103.
Atoms, see *Molecules*.
Atomic volume of some isomorphous oxyds of the regular system, *C. Gerhardt*, 405.
Aurora borealis, notice of a report on, by a commission to Scandinavia, 142.
Auroral belt of April 7, 1847, *E. C. Herrick*, 145.
—— arches, height of, *T. Chevallier*, 436.
Australia, fossils from, *J. D. Dana*, 151.
——, copper of, 255.

B.

Bacon, Dr., microscopic examination of gun-cotton, 448.
Bailey, J. W., notice of d'Orbigny's work on Foraminifera, 452.
Bakewell, R., on the Whirlpool and Rapids, Niagara, 25.
Barbadoes, geological structure of, *R. H. Schomburgk*, 416.
Basalt of Lake Superior, 118.
Basilosaurus, *J. Muller*, 421.
Beaches, ancient sea, *R. Chambers*, 323.
Beaver in Alabama, 285.
Ben, fat acids of the oil of, 271.
Berzelius, on ozone, 265.
Bessel, F. W., Life, Researches and Discoveries of, 305.
——, zones of stars, begun, 311.
Birt, W. R., on atmospheric waves, 433.
Bismuthic gold, 281.
Blowpipe, oxyhydrogen, improvements by *R. Hare*, 37.
——, ——, apparatus for fusion of Rhodium, Iridium, &c., *R. Hare*, 44.
Bond, W. C., comet seen by, July, 1847, 287.
——, nebula in Orion resolved by the Cambridge Telescope, 426.
Boracite, amorphous, *Karsten*, 415.
Boston Society of Nat. Hist., Proceedings of, 149, 303.
Botanical notes on Madeira, Teneriffe and the Cape de Verds, from Vogel's Voyage, 119.
—— Garden at Kew, 249.
—— —— ——, on colored glass for glazing Palm house at, 431.
Botany, some observations on progress in, 251.
——, *Darlington's* Agricultural, noticed, 451.
Boyé, analysis of a concretion from a horse's stomach, 274.
——, acetate of lime formed in coal pits, 275.
British Association, seventeenth meeting, address of the President, 238.

Brocklesby, J., supernumerary rainbows, 429.
Brontozoum, 50.
Brumley, R. T., beaver in Alabama, 285.
Bull, B. W., chemical examination of several waters from Hartford, Ct., 385.
Bunbury, C. J. F., coal plants from near Richmond, Va., 114.
Burr, E. F., theory of transit corrections, 258.

C.

Cactus at Kew, weighing a ton, 251.
Caoutchouc, singular effect of latent heat, *C. G. Page*, 341.
Cape de Verds, notes on, 123.
—— ——, recent volcanic eruption at, 146.
Carbon, compounds of iron with, *Karsten*, 104.
Carey, J., on three new Carices and a new Rhynchospora, 22.
Carex lolinacea and C. gracilis, *A. Gray*, 19.
Carices, three new species, *J. Carey*, 22.
Caricography, *C. Dewey*, 343.
Casein, 403.
Cassin, J., on the Cymindis Wilsonii, 285.
Challis, Prof., new theory of the polarization of light, 112.
Chamæa, a new genus of birds, *W. Gambel*, 286.
Chambers, R., ancient sea margins, 323.
Chemistry, Organic, of *Gerhardt*, reviewed, *T. S. Hunt*, 93, 171.
——, physiological, facts in, *J. Liebig*, 135, 298.
——, ——, *Prof. Mulder*, 402.
Cleavage, on slaty, *D. Sharpe*, 110.
Coal and iron in India, 109.
—— field, near Richmond, Va., *C. Lyell*, 113.
—— plants from near Richmond, Va., *C. J. F. Bunbury*, 114.
—— pits, acetate of lime formed in, 275.
Cobalt, separation of, from manganese, 271.
——, oxyd of, with brown hematite, Chester Ridge, Pa., 281.
Cohesive attraction, on certain laws of, *J. D. Dana*, 364.
Coke, diamonds converted into, 409.
Colored glass, for glazing Palm house at Kew, 431.
Columba, new species of, from Mexico, *G. A. M'Call*, 421.
Columbite, large crystal, purchased by the Wesleyan University, Middletown, Ct., 449.
——, on the acid in the North American, *H. Rose*, 468.
Comet, new, July, 1847, 287, 426.
—— of May 7, 1847, 426.
—— of August 11, 1847, *M. Schweizer*, 426.
—— of Oct. 1, 1847, 426.
Compound radicals, objections to theory of, 93.
Compression and distortion of fossils, 111.
Concentric aggregations, cause of, 379.
Concretion from a horse's stomach, analysis of, 274.
Concretionary structure, cause of, 379.
Condor of the Cordillera, 447.
Congelation of mercury, by virtue of the spheroidal state, 101.
Connecticut valley, trap tuff of, *E. Hitchcock*, 199.
Connell, Prof., on sulphato-chlorid of copper, a new mineral, 415.
Continents, origin of features of, 92.
Contraction of earth during cooling, geological effects of, *J. D. Dana*, 88.
Copper, mass of native, Lake Superior, *F. Shepherd*, 115.
—— ores, reduced by electricity, 276.
—— ——, smelting, 292.
——, sulphato-chlorid of, a new mineral, 415.
Corals, tertiary, on some species of, in reply to Mr. Dana, *W. Lonsdale*, 357.
——, ——, ——, in reply to Mr. Lonsdale, *J. D. Dana*, 359.
Cotton, detection of, in linen, 106.
Crawe, Ithamar B., obituary notice of, 309.
Crystallogenic attraction identical with cohesive attraction, 364.
Crystals, forms and polarity of molecules of, *J. D. Dana*, 367.
——, origin of secondary planes, *J. D. Dana*, 372.
——, origin of cleavage of, *J. D. Dana*, 378.
——, effects of tension in, on polarization, *J. D. Dana*, 369.
Cymindis Wilsonii, a new bird, *J. Cassin*, 285.

D.

Daguerreotype plate, different properties of rays on, *A. Claudet*, 409.
—— for copying microscopic objects, 411.
Dana, J. D., general review of the geological effects of the earth's coolings from a state of igneous fusion, 88.
——, fossil shells from Australia, 151.
——, observations on some tertiary corals described by Mr. Lonsdale, 359.
——, on certain laws of cohesive attraction, 364.
——, forms and polarity of molecules, 365.
——, origin of secondary planes, 372.
——, origin of cleavage, 378.
——, observations on molecules, 382.
Darlington's Agricultural Botany, 451.
Datura sanguinea, effects of, 446.
Davis, E. H., publications by, on Indian mounds, under the Smithsonian Institution, 438.
Dawson, J. W., reproduction of forests in British North America, 101.
Deane, J., observation on a fossil footprint, 448.
Detonating compounds formed with nitric acid, on sugar, dextrine, &c., *A. Sobrero*, 274.
Dewey, C., on Caricography, 343.
Diamonds converted into coke, 409.
Diatomaceous vegetation of the Antarctic Ocean, *J. Hooker*, 424.
Dictionary of Modern Gardening, *G. W. Johnson*, 148.
Diphanite, a new mineral, 277.
Dodo, and allied birds, on the history of, *H. E. Strickland*, 422.
D'Orbigny, A., on the Orbitolina, 282.
——, on Foraminifera, noticed, 452.
Draper, J. W., on the production of light by heat, 388.
Drift furrows, scratches, &c., near Lake Superior, *F. Shepherd*, 282.
Dutton, T. R., basalt of Lake Superior, 118.

E.

Ear of Limnæus stagnalis, 130.
Earth's contraction during cooling, geological effects of, *J. D. Dana*, 88.
—— crust, thickness of, *W. Hopkins*, 88.
Earth, on the figure of, *Bessel*, 317.
Ehrenberg, on the sirocco dust that fell at Genoa, May 16, 1846, 423.
Electric Telegraph, 253.
Electrical attraction, on the nature and laws of, *W. S. Harris*, 113.
Electrolysis, quantity of, as affected by the extent of the sectional area of the electrolyte, 411.
Equivalent number of Titanium, 103.
Ether, inhalation of, 138, 246.
Europe, water power of, 145.
Exhalation from the lungs of bicarbonate of ammonia, 274.

F.

Faraday, M., congelation of mercury, by virtue of the spheroidal state, 101.
Ferrideyanid of potassium, preparation of, 271.
Fertilization and nitrification of soils, *F. Kuhlmann*, 107.
Fisheries, resources of Irish, 437.
Footmarks, two new species in Massachusetts and Connecticut, *E. Hitchcock*, 46.
——, *J. Deane's* reclamation relative to a species of, 148.
Foraminifera, *D'Orbigny's* work on, noticed, 452.
——, distribution of, 453.
—— of Charleston, S. Carolina, 453.
Forests, reproduction of, British N. A., *J. W. Dawson*, 161.
Fossil shells, distortion of, 111.
—— coal plants, from near Richmond, Va., *C. J. F. Bunbury*, 114.
—— —— —— of anthracite, *J. E. Teschemacher*, 420.
—— trees, Bristol, Ct., 116.
—— remains from Australia, *J. D. Dana*, 151.
—— flora of European Miocene analogous to recent of America, 424.
Fungus, phosphorescent, 446.

G.

Gambel, W., on Chamæa, a new genus of birds, 286.
Gardening, Dictionary of Modern, by *G. W. Johnson*, 148.
Gastric juice, acid reaction of, 102.
Gelatine sugar, see *Glycocoll*.
Geological Society of France, extraordinary session of, in 1847, 449.
—— Journal, London, notice of, 450.
Geologists and Naturalists, Association of, 146, 427.
Geology, Elementary, by *E. Hitchcock*, 146.
—— of the Isle of Wight, *G. A. Mantell*, 147, 230.
——, *C. Lyell's* new edition, 147.
——, *D. T. Ansted's* works on, noticed, 300.
Gerhardt, C., Organic Chemistry reviewed, 93, 171.
——, on the atomic volume of some isomorphous oxyds of the regular system, 405.
Gillespie, W., Manual of Road Making 148.
Glass, colored, for glazing Palm house at Kew, 431.
Glycocoll, *E. N. Horsford*, 58, 326.
—— and alcargene, relations of, *T. S. Hunt*, 108, 266.
Gray, A., note on Carex loliacea and C. gracilis, 19.
Grove, W. R., on the quantity of electrolysis as affected by the extent of the sectional area of the electrolyte, 411.
Gun-cotton, *Schönbein's* patent, 138
——, experiments with, in blasting, *T. B. Adams*, 139.
——, formula of, and some allied compounds, 140.
——, on the discovery of, *C.F. Schönbein*, 440.
——, microscopic examination of, 448.
Gutta percha, 289.
—— ——, *E. Soubeiran*, 291.
—— —— for modelling, *Busk*, 432,
—— ——, pronunciation and etymology of the term, 289, 433.

H.

Haidinger, W., on Hauerite, 108.
Hare, R., on the hydro-oxygen blowpipe, and arrangements for fusing Rhodium, Iridium, &c., 37.
Harris, W. S., protection against lightning, 430.
——, on the nature and laws of electrical attraction, 413.
Harvard, department of Science and Arts, founded by Hon. *A. Lawrence*, 146, 294.
Hauerite, a new mineral, 108.
Heat and Magnetism, relations of, *W. A. Norton*, 1, 207.
——, latent, effect in caoutchouc, and necessity of to elasticity, *C. G. Page*, 341.
——, on the production of light by, *J. W. Draper*, 388.
—— of commencing incandescence, uniform for different substances, 389.
Hebe, new planet, discovery of, 286.
Hencke, discovery of planet Hebe, 286.
Henry, Prof. J., observation on the interference of rays of heat, 148.
Herrick, E. C., Auroral belt of April 7, 1847, 145.
Herschel, J. F. W., life of Bessel, 305.
Hind, J. R., discovery of planet Iris, 425.
Hints to Young Architects, by *G. Nightwick*, noticed, 302,
Hitchcock, E., two species of fossil footmarks, 46.
——, notice of Elementary Geology by, 146.
——, trap tuff or volcanic grit of Connecticut valley, 199.
Homologies of the vertebrate skeleton, *R. Owen*, 123.
Hooker, Dr. *J.*, on the Diatomaceous vegetation of the Antarctic Ocean, 424.
Horse's stomach, analysis of concretion from, 274.
Horsford, E. N., on glycocoll, 58, 326.
——, Varrentrapp and Will's method for the determination of nitrogen, improved, 267.
Hunt, R., on colored glass for glazing green houses, 431.
——, influence of light on growth of plants, 410.

Hunt, T. S., review of Gerhardt's Précis, 93, 171.
——, on the relation of alcargene and glycocoll, 108, 266.
——, action of sulphuretted hydrogen on nitric acetene, 350.
Hydrocyanic acid, new test for, 101.
Hydro-oxygen blowpipe, *R. Hare*, 37.

I.

India, iron and coal in, 109.
Indian Mounds, hieroglyphical mica from, 115.
—— ——, remarks on, 439.
Inglis, R. H., address before the seventeenth meeting of the British Association, 238.
Iowa meteoric stones, fall of, 288, 429.
Iridium, apparatus for fusion of, *R. Hare*, 41.
Iris, new planet, discovery of, 425.
Irish sea-fisheries, resources of, 437.
Iron, compounds of, with carbon, 104.
—— and coal in India, 109.
Isodynamic lines of N. America, 197.
Isomorphous oxyds of the regular system, atomic volume of, *C. Gerhardt*, 405.

J.

Johnson, G. W., Dictionary of Modern Gardening, 148.

K.

Karsten, compounds of iron with carbon, 104.
——, amorphous boracite, 115.
Kew, Botanical garden at, 249.
—— —— ——, colored glass for glazing Palm house, 431.
Keyserling, Count, Geology of the Petschora Land, noticed, 419.

L.

Lake Superior, mass of native copper from, 115.
—— ——, columnar basalt on, 118.
Lalande, star observed by, identical with Neptune, 133.
Latent heat, effect in caoutchouc, and necessity of to elasticity, *C. G. Page*, 341.
Lawrence, Hon. Abbot, munificent donation of, to Harvard, 146, 294.
Level, changes of, indicated by sea beaches, *R. Chambers*, 323.
Lexicon Scientiarum, by *H. McMurtrie*, noticed, 454.
Liebig, J., new test for prussic acid, 101.
——, new method for sulphocyanid of ammonium, 101.
——, fact in physiological chemistry, 135, 298.
——, composition of quinoidine, 271.
Light, on the production of, by heat, *J. W. Draper*, 388.
——, from incandescence, commences to appear at the same temperature for different bodies, 389.
——, color of rays from incandescent bodies, 391.
——, relation of brilliancy of, to temperature, 395.
——, different properties of various rays of, on Daguerrotype plates, 409.
Light, influence of, on growth of plants, *R. Hunt*, 410, 431.
——, new theory of polarization of, Prof. *Challis*, 412.
Lightning, protection against, *W. S. Harris*, 430.
Limnæus stagnalis, ear of, 131.
Linen, detection of cotton in, 106.
Lonsdale, W., remarks on some tertiary corals in reply to Mr. Dana, 357.
Loomis, E., magnetism of the U. States and vicinity, 192.
——, account of a water-spout, 362.
Lunar theory, progress in, 242, 243.
Lyell, C., on the coal field near Richmond, Va., 113.
——, new edition of Principles of Geology, 117.
——, age of nummulite limestone of Alabama, 186.

M.

Madeira, notes on plants of, 119.
Magnetism, terrestrial, Prof. *W. A. Norton*, 1, 207.
——, relations of heat and, *W. A. Norton*, 1, 207.
——, of the U. States and vicinity, *E. Loomis*, 192.
—— ——, observations by Major *Graham*, Prof. *Locke*, and Capt. *Lefroy*, 192.
——, influence of trap rock on, 198.
Mammoth, food, distribution, &c. of, *R. Owen*, 13.
Manganese, separation of cobalt from, 271.
Mantell, G. A., Geology of Isle of Wight, 147, 230.
Manual of Road Making, *W. Gillespie*, 148.
Matter, general remarks on molecular constitution of, *J. D. Dana*, 382.
M'Call, G. A., a new species of Columba, 421.
McMurtrie, H., Lexicon Scientiarum of, noticed, 454.
Mercury, congelation of, by virtue of the spheroidal state, 101.
Meteoric iron of Walker Co., Alabama, 74.
—— —— of Scriba, N. Y., 75.
—— —— of Babb's Mill, Tenn., 76.
—— —— of Burlington, N. Y., 77.
—— —— of Hommoney Cr., N. C., 79.
—— —— of Black Mountain, N. C., 82.
—— —— of Cocke Co., Tenn., 83.
—— —— of Randolph Co., N. C., 85.
—— —— of Bedford Co., Penn., 85.
—— —— of Otsego Co., N. Y., 85.
—— —— of Franconia, N. H., 87.
Meteoric stones, fall of, in Iowa, *C. U. Shepard*, 288.
—— ——, ——, ——, *J. Barney*, 429.
—— —— of Concord, N. H., *B. Silliman, Jr.*, 353.
Meteorites, Report on, *C. U. Shepard*, 74.
Mica, hieroglyphical, from the Indian mounds, 115.
Microscopic organisms, Barbadoes, 416.
—— ——, in Sirocco dust, 423.
Millon, E., on the decomposition of nitrite of ammonia, 269.
Minerals:—Amorphous boracite, 115; Acetate of lime, 275; Arkansite, 279; Bismuthic gold, 281; Diphanite, 277; Hauerite, 108; Oxyd of cobalt with brown

hematite, Chester Ridge, Pa., 281; Platinum, native, in N. Carolina, 280; Sulphatochlorid of copper, 415; Tautolite on north shore of Lake Superior, 278.
Minhoçao, 130.
Molecules, forms and polarity of, 366.
——, polarization dependent on form, *J. D. Dana*, 369.
——, attraction of, admits of various modifications, *J. D. Dana*, 371, 372.
——, attraction of, intermittent in action, *J. D. Dana*, 378.
——, general remarks on, *J. D. Dana*, 382.
Mulder, Prof., on the changes in albuminous substances during digestion, 402.
Muller, J., on the Zeuglodon, 421.

N.

Natural Philosophy for Schools, by *H. L. Smith*, noticed, 302.
Nebula in Orion resolved by the Cambridge Refractor, 426.
Neptune, Prof. *B. Peirce* on, 132.
——, identity with a star seen by Lalande, *S. C. Walker*, 133.
——, supposed ring and satellite, 287.
Niagara whirlpool and rapids, *R. Bakewell*, 25.
Nicotine, mode of determining the amount of, in tobacco, 272.
Nightwick, G., Hints to Young Architects by, noticed, 302.
Nitrates, mode of estimating, *J. Pelouze*, 270.
Nitric acid, forms detonating compound, with sugar, dextrine, &c., *A. Sobrero*, 274.
Nitric acetene, action of sulphuretted hydrogen on, *T. S. Hunt*, 350.
Nitrification of soils, *F. Kuhlmann*, 107.
Nitrogen, Varrentrapp and Will's method for the determination of, *E. N. Horsford*, 267.
——, quick method for determining, in organic substances, *E. Peligot*, 269.
North Carolina, platina in, 280.
Norton, J. P., on the Potato disease, 70.
Norton, W. A., on Terrestrial Magnetism, 1, 207.
Nummulite limestone of Alabama, age of, *C. Lyell*, 186.
Nutrition of animals, influence of ammonia on, 273.

O.

Obituary notice of *Ithamar B. Crawe*, 300.
Ocean, Antarctic. Diatomaceous vegetation of, *J. Hooker*, 424.
Oil of Ben, fat acids of, 271.
——, olive, mode of detecting its adulteration with rape or poppy oil, 272.
Orbigny, A. d', on the Orbitolina, 282.
——, work by, on the Foraminifera, noticed, 452.
Orbitolina, note on, by *d'Orbigny*, 282.
Organic Chemistry, Review of Gerhardt's, *T. S. Hunt*, 93, 171.
—— ——, homology and analogy in, 96.
Orion, nebula in, resolved by the Cambridge Refractor, 426.
Orkney, formation of cylindrical masses of snow in, 292.
Ornithology—Cymindis Wilsonii, 285.
—— Chamæa, a new genus, *W. Gambel*, 286.
Ornithology, a new species of Columba, *G. A. M'Call*, 421.
——, on the Dodo and allied birds, *H. E. Strickland*, 422.
——, Condor of the Cordillera, 447.
Otozoum, 54.
Outlines of qualitative analysis, Giessen, 455.
Owen, Prof. R., on the mammoth, 13.
——, on the fundamental type and homologies of the vertebrate skeleton, 123.
Ozone, remarks on, *J. Berzelius*, 265.
——, properties of, *C. F. Schönbein*, 445.

P.

Page, C. G., singular property of caoutchouc, 341.
Palæontographical Society of London, 299.
Peirce, B., on the planet Neptune, 132.
Peligot, E., method for determining nitrogen, 269.
Pelouze, J., mode of estimating nitrates, 270.
Pendulum experiments by Bessel, 314.
Petschora-Land, geology of, 419.
Philosophical Society, American, Transactions of, 148.
—— ——, ——, Proceedings of, 148, 303.
Phosphorescent fungus, 416.
Phosphoric acid, compounds of, with aniline, 108.
Photography on paper, process for, 141.
——, application to copying microscopic objects, 411.
——, Daguerreotype, different properties of various solar rays in, 409.
Physiological Chemistry, facts in, *J. Liebig*, 135.
Planet Neptune, Prof. *B. Peirce* on, 132.
—— ——, identity with Lalande's star seen in 1795, *S. C. Walker*, 133.
—— ——, supposed ring and satellite, 287.
—— Hebe, new, discovered by *Hencke*, 286.
—— Vesta, 287.
—— Iris, new, discovered by *J. R. Hind*, 425.
Platinum, apparatus for fusing, *R. Hare*, 44.
——, native, in North Carolina, *C. U. Shepard*, 280.
Polarization of light, new theory of, *Prof. Challis*, 412.
Polycistina of the Barbadoes, 416.
Polythalamia, d'Orbigny's work on, noticed, 452.
——, of South Carolina, 453.
——, geographical distribution of, 452.
Potassium, preparation of ferridcyanid of, 271.
Potato disease, *Prof. Harting*, 70.
Prussic acid, new test for, *J. Liebig*, 101.
Pyroxyline, and analogous compounds, 140, 274.
——, formula of, *see note*, 141.

Q.

Quinoidine, composition of, *J. Liebig*, 271.

R.

Rainbows, supernumerary, *J. Brocklesby*, 429.
Retzius, A., letter from, on the Zeuglodon, 421.
Rhodium, apparatus for fusing, *R. Hare*, 44.

Rhynchospora Knoiskernii, *J. Carey*, 25.
Road Making, *W. Gillespie's* Manual of, 148.
Rose, H., on the acid in the North American Columbite, 408.
Royal Society, historical remark relating to, 256.
Rucu-Pichincha, exploration of the volcano, 417.
Russia, Geology of the Petschora Land, by Count Keyserling, 419.

S.

Saint Hilaire, A. de, on the Minhoçao, 130.
Sandstone, Bristol, Ct., containing fossil trees, 116.
Schomburgk, R. H., on the Barbadoes, 416.
Schonbein, C. F., patent of, for gun-cotton, 138.
——, properties of ozone, 320.
——, on the discovery of gun-cotton, 440.
Schroter, Bessel assistant to, 307.
Sea margins, ancient, *R. Chambers*, 323.
Sharpe, D., on slaty cleavage, 110.
Shepard, C. U., Report on Meteorites, 74.
——, mineralogical notices, (Tautolite, Arkansite, native platinum in North Carolina,) 278.
——, fall of meteoric stones in Iowa, 288.
Shepherd, F., mass of native copper, Lake Superior, 115.
——, on drift furrows, scratches, &c., Lake Superior, 282.
——, habits of Notonecta glauca, 423.
Siberian mammoth, 13.
Sillimax, B., Jr., fossil trees of Bristol, Ct., 116.
——, meteoric stone of Concord, N. H., 353.
Sirocco dust, microscopic animals in, *Ehrenberg*, 423.
Slaty cleavage, *D. Sharpe*, 110.
Smith, H. L., Natural Philosophy for the use of Schools, by, noticed, 302.
Smith, J. Lawrence, in Turkey, 449.
Smithsonian Institution, first publication of, 438.
Snow, cylindrical masses, in Orkney, 292.
Soda, action of caustic, on a stone jar, 105.
Soils, nitrification and fertilization of, *F. Kuhlmann*, 107.
South America, exploration of the volcano of Rucu-Pichincha, 417.
Spheroidal state, congelation of mercury, by, 101.
Squier, E. G., hieroglyphical mica from the mounds, 145.
——, publication of, under the Smithsonian Institution, 438.
Stone jar, action of caustic soda on, 105.
Strickland, H. E., on the Dodo and allied birds, 422.
Sulphato-chlorid of copper, a new mineral, *Prof. Connell*, 415.
Sulphuretted hydrogen, action of, on nitric acetene, *T. S. Hunt*, 350.
Superior, Lake, mass of native copper from, *F. Shepherd*, 115.
——, ——, columnar basalt on, 118.
——, ——, Tautolite on north shore, 278.

T.

Tantalite, on the acid in the North American, *H. Rose*, 408.
Tartaric acid, fermentation of, 271.
Tautolite on north shore of Lake Superior, 278.
Telescope, new, of Cambridge, nebula in Orion resolved by, 426.
Teneriffe, notes on plants, &c. of, 121.
Teschemacher, J. E., fossil vegetation of anthracite coal, 420.
Titanium, equivalent number of, 103.
Tobacco, mode of determining the amount of nicotine in, 272.
Transit corrections, theory of, *E. F. Burr*, 258.
Trap tuff of Connecticut valley, 199.
Trees, fossil, Bristol, Ct., 116.
Tuomey, cranium of the Zeuglodon, 149, 283.
Turkey, *J. Lawrence Smith* chemist and geologist in, 449.

V.

Vanilla, production of, in Europe, 445.
Varrentrapp and *Will's* method for nitrogen, improved, *E. N. Horsford*, 267.
Verds, Cape, notes on, 123.
Vertebrate skeleton, type and homologies of, *R. Owen*, 123.
Vinegar, arsenic in, 272.
Vogel's voyage to the Niger, notes from, 119.
Volcanic eruption at the Cape Verds, 146.
—— grit of Connecticut valley, *E. Hitchcock*, 199.
Volcano, Rucu-Pichincha, exploration of, 417.

W.

Walker, S. C., identity of Neptune with a star observed by Lalande, 133.
Waters, chemical examination of several, from Hartford, Ct., *B. W. Bull*, 385.
Water-spout, an account of one, *E. Loomis*, 362.
Water power of Europe, 145.
Weights and measures, Prussian standard, fixed by Bessel, 316.
Wetherill, C. M., analysis of a concretion from a horse's stomach, 274.
Will, H., Outlines of the Giessen course of Qualitative Analysis, 455.

Z.

Zeuglodon, cranium of, *M. Tuomey*, 149, 283.
——, *Prof. J. Muller* on, 421.
Zoophytes, remarks on formation of coral, *J. D. Dana*, 360.
——, genera Madrepora and Oculina, remarks on, *J. D. Dana*, 361.
